ried woman; but she will be invited to her place just in time for the pleasant, and the Morrison girl will get over her fondness before we meet her in town again.

Cytheria gazed reflectively at me. I candidly confess that I never did like Cytheria's reflective gaze. It was the one feature that I always felt was not a confiding one. She looked as if she wanted to read the inner meaning of everything one said, which, as Mr Smith or some one who wrote a book on arithmetic, remarked, is absurd.

No, she said. I positively jumped. Cytheria said I you surprise me. After lavishing, as I have for the past three years, the greater part of my affection upon you, spending at a country house often a whole week in your society, even, to see you for an evening, accepting the ostentatious hospitality of the man Marchison, whom I detest for his egotistical vanity, and despite for his positively childish infatuation for his most ordinary wife—you turn and read my most intricate and sensitive feelings in this way. I am grieved. I am hurt.

Cytheria buried her face in her handkerchief. I will be generous and say that she seemed at any rate to be touched by my words. My dear Mr. Spallio, she said. I really don't want to hurt you—much. You are immensely amusing (causing) oh, shades of evening, and if you didn't talk platitudes about the affections you might find someone else some day to really like you. But I distinctly object to having my name linked again with that of a man who behaves in this altogether ridiculous way.

There is a mutability, I began. There has been too much mutability, interrupted Cytheria. You remember Mrs. Marchison—

That was before she was married, I pleaded. And the Poylow woman? Her husband was dead, I said. And that matter of the Carabrook? That—I waded my hand with dignity. I have never touched upon to you.

No, but Mrs. Marchison has, said Cytheria. And now the Morrison girl—She had one of those floppy hats on, I murmured humbly.

You are incorrigible, said Cytheria; and you must go and get it over with Sophie yourself. Cytheria and I walked back to the house. I have just seen her going across the lawn towards that Seifers fellow. It's all very well for Cytheria to treat it so lightly, but I know what the end of it will be. I shall marry that Morrison girl—and Cytheria will be sorry. It was just the same with Elvina.

—E.

TO GET RID OF A TROUBLESOME CORN.

FIRST soak it in warm water to soften it, then pare it down as closely as possible without drawing the blood, and apply Chamberlain's Pain Balm twice daily: rubbing vigorously for five minutes at each application. A corn plaster should be worn for a few days, to protect it from the shoe. As a general liniment for sprains, bruises, lameness and rheumatism, Pain Balm is unequalled. For sale by All Dealers. WATKINS Ltd., General Agents.

**The China Mail.**

HONGKONG, THURSDAY, DECEMBER 5, 1901.

**EDITORIAL COMMENT.**

**FOREIGN.**

Rumours have been in circulation for some time that Germany and France at CANNON, are both endeavouring to obtain new Settlements at Canton. Upon enquiry in well-informed circles, we learn that France has asked for Honan and that Germany desires to acquire Fokien or Pa Ti. The recent visit of the German Minister to Canton is supposed to have had some connection with this proposal, and we have not the slightest doubt that if Germany wants a Settlement in the neighbourhood of Canton she will get it. It may be, however, that the German Minister was in Canton also to settle the claims for compensation for the destruction of the Basel Mission Stations in the Hsingning district. We learn from Shanghai that this claim has been settled by the payment of \$30,000, and that the Viceroy of Canton has wisely decreed that the burden of this shall be borne by the people of the district where the outbreak occurred. With reference to the proposed new Foreign Settlements at Canton, the Shanghai Mercury publishes the following paragraph:—

A despatch from Canton says that a certain Consul at Canton recently informed the Viceroy that as the number of merchants of his country in Canton gradually increased, his Government desired to establish a new Settlement in that city, and that, therefore, he requested the Viceroy to concede a piece of land in Honan (opposite Canton) for the purpose. The Viceroy reported the claim to the Board of Foreign Affairs at Peking, and received a reply to the effect that, as the Board understood that several foreign Powers wished to extend their Concessions in Canton, the Chinese Government would rather grant a large piece of land near Honan to be used as an International Settlement than yield to the request of one particular country.

**LOCAL AND GENERAL.**

**Roadway.**

A horse, yoked to a trap, bolted near the Metropole Hotel yesterday. The frightened animal ran for three miles, and was finally brought to a standstill by colliding with a log. The machine was damaged, but the horse was almost unharmed. Fortunately, the road was clear. The horse and trap were the property of Mr. Sassoon.

**Lamp Accident.**

Last night, George Ray, Marine, belonging to the U. S. *Monadnock*, visited No. 40, Ship Street. He remained in the house for about two hours, but at eleven o'clock he had a dispute with one of the girls and took up a lamp to throw after her as she ran away from him. The oil escaped from the lamp, ran down his arm, side, and one of his legs, and he was seen in flames. He is now in the Naval Hospital suffering from very serious burns.

**The Disinfection of the Colony.**

It seems that, notwithstanding the great precautions taken by the Sanitary Authorities to prevent the removal of furniture and clothing from houses undergoing disinfection under the scheme for disinfecting the whole Colony, cases of the surreptitious removal of goods and chattels by the inmates of the houses are numerous. The people know full well the penalties they risk by so doing under the recently introduced bye-law, and there is no excuse for them on the ground of ignorance of the law. Inspector Baker and some of his men went out last night to make a few captures of culprits of this class, and succeeded in rounding up a dozen of them. They were brought before Mr. Kemp to-day and fines were inflicted, which should be a warning to them and to all others for the future.

**Nursing Mothers.**

The quality and quantity of an infant's food is often seriously affected by the state of its mother's health who nurses it. Ill health of mothers is frequently the cause of indigestion and diarrhoea in their babies which are nursed at the breast. Poor watery, scanty and insufficient milk cannot properly nourish a baby. Food will disorder the health of the child and will cause emaciation. Stein's Wine of Cod Liver Oil increases the flow of milk, makes it rich, and at the same time builds up the mother's system. Remember the mother to get from her food the greatest quantity of nourishment. It is satisfying in the highest degree through this trying period a time when the organs of digestion and assimilation must furnish nutrition for both mother and child. At all Chemists, and Wholesale from A. S. Watson & Co., Ltd., Hongkong.

**LOCAL AND GENERAL.**

**Notes by the Way.**

The King is continuing the bounty for triplets.

M. Blanche, the Mayor of Saigon, is dead.

A few cases of plague are reported among the troops in South Africa, mostly at coast ports.

Parcel Mails for Europe, etc., per a.s. *Baltoara*, will close at 3 p.m., on Friday, the 6th inst.

We understand (says the N.O. Daily News) that Mr. Alfred Holt did make an offer for the fleet of the China Mutual Company, but that it has had no result.

The Filipino student, charged with the abduction of a girl of 16 years, without permission from her father, was discharged to-day, being found not guilty of the offence alleged.

The Canadian Pacific Railway Company has decided to send one of its leading officials to reside permanently in Australia for the purpose of promoting trade between the Commonwealth and Canada.

A private in the Cayton Light Infantry Volunteer Corps has been sentenced to undergo seven years' rigorous imprisonment for attempting to murder a brother Volunteer by firing at him with his service rifle.

**Important Wages Case.**

An important point in merchant shipping law was considered on 28th October in the Liverpool Police-court before Alderman Menlove and Mr W. Clarkson. Robert Borland, marine fireman, claimed from Mr. John Edwards, shipowner, £5 17s. 6d., balance of wages up to July 26, and £8 5s., wages accruing during the passage home from July 27 to Sept. 25 making £14 2s. 10d. altogether. Mr. Quilliam, for the plaintiff, said that Borland and others shipped on the steamer *Hindostan* belonging to the defendants. When the vessel arrived at Yokohama, Japan, she was sold. It was admitted that the wages would be due to the men up to the sale, but the question was whether they were entitled to wages for the trip home, the owners having paid for the men to come home by another vessel. Mr. Stewart Brown, for the defendants, said that what the Consul at Yokohama did was in no way binding on the owners. Throughout the whole transaction the seamen was only entitled to the wages he had actually earned. The men having signed the discharge at Yokohama, they were clear of the ship, and no wages could be sued for. Mr. Quilliam produced the log, and said that the British Consul's endorsement at Yokohama showed that the men had only signed the discharge on being given the authority of the owners, signed by the master, to receive the full amount of their wages up to the time of their arrival in England. The magistrates made the order for the full amount claimed, allowed costs, and a guinea for the advocate's fee. Mr. Brown.—If we desire it, I suppose you will grant a case. Alderman Menlove.—I should think the firm would hardly shirk their responsibility. Mr. Brown.—It is an important matter.

**LOCAL AND GENERAL.**

**Notes by the Way.**

The King is continuing the bounty for triplets.

M. Blanche, the Mayor of Saigon, is dead.

A few cases of plague are reported among the troops in South Africa, mostly at coast ports.

Parcel Mails for Europe, etc., per a.s. *Baltoara*, will close at 3 p.m., on Friday, the 6th inst.

The Filipino student, charged with the abduction of a girl of 16 years, without permission from her father, was discharged to-day, being found not guilty of the offence alleged.

The Canadian Pacific Railway Company has decided to send one of its leading officials to reside permanently in Australia for the purpose of promoting trade between the Commonwealth and Canada.

A private in the Cayton Light Infantry Volunteer Corps has been sentenced to undergo seven years' rigorous imprisonment for attempting to murder a brother Volunteer by firing at him with his service rifle.

**LOCAL AND GENERAL.**

**Suicide of a European.**

Last night, the body of a European, up to the present unidentified, was found on the Shamkwan Road, between the Metropole Hotel and Tai-tai-mint. The deceased, a middle-aged man, had a revolver bullet wound through his head, and a five-chambered revolver, with four chambers loaded, was found lying by his side. It is supposed to have been a case of suicide, and the body was removed to the Mortuary.

**Henley Regatta.**

The following notice appears in London contemporaries:—Mr. Grenfell's motion as to foreign entries at Henley will come before the Stewards of Henley Regatta on November 23. Secretaries of clubs who usually compete at Henley, and who may desire to memorialise the Stewards on the subject, should, therefore, send the resolutions of their respective clubs to the Secretary, Henley Royal Regatta, on or before November 23.

**Wanchai Warehouse and Storage Co.**

An extraordinary general meeting of the Wanchai Warehouse and Storage Company, Limited, was held at the Company's Office, No. 5, Queen's Road Central, to-day, when the subject of resolution, which was passed at the extraordinary general meeting of the Company held on the 18th November, was submitted for confirmation as a special resolution:—That the Company be wound up voluntarily and that John Georg Ludwig Schriber of Victoria in the Colony of Hongkong be and he is hereby appointed liquidator for the purposes of such winding up. The resolution was confirmed.

**The Canadian Pacific Railway.**

We have received from Mr D. E. Brown, the General Agent of the C. P. R., two handsome volumes relating to this popular British Company, and the recent tour in Canada of the Duke and Duchess of Cornwall and York. The publication entitled 'The Royal Visit to Canada' gives a detailed description of the royal train, with illustrated cuts showing the complete arrangements, also the principal points of interest en route. The publication 'Across Canada' gives the itinerary for the whole trip, with maps and detailed information. The description of the Royal train will perhaps have renewed interest for our readers, as we are informed that their Royal Highnesses were so pleased with the accommodation that the train may be shipped to England for their permanent use.

**The Prince of Wales.**

Now that it is settled that the Duke of Cornwall shall be present at the national Eisteddfod at Bangor next March, an enthusiastic desire prevails among Welshmen that the proclamation and subsequent installation of the Prince of Wales should take place at Carnarvon Castle. It is also suggested that the Duke of York should, during his tour in Wales, journey to St. David's and be there installed on behalf of the King in the royal cathedral stall, over which are placed the arms of Edward VI. It was in Carnarvon that Edward I. made his baby son first Prince of Wales, as a diplomatic answer to the Welsh demand for a prince who 'could not speak English.' If the designation of the Duke as Prince of Wales is to be postponed until next year, it would be a graceful act to let him assume the title within the limits of the principality.

**A Serious Fire Averted.**

The N.O. Daily News of the 30th ult. says:—A fire which, had it been allowed to spread, might easily have destroyed the block at the corner of Footscrow Road and the Band was discovered about 4.45 a.m. yesterday. From his bedroom window Mr. A. P. Stokes—who lives over the premises of Messrs. Calbeck, Macgregor & Co.—saw that the silk room of Messrs. Oliver & Co., next door, was afire. He at once awoke his messmates, Mr. R. B. Allen and Mr. N. J. Stabb, and while the latter rushed off to get a hose, the former rang up the Central Police Station and told them of the fire. Unfortunately, there had been some mistake either in giving or receiving the message, for no alarm was given and the Brigade did not turn out. Mr. Allen then rejoined Mr. Stokes, and together they threw buckets of water across the alley-way into the windows of the silk-room, which had cracked open with heat. Mr. Stabb, meanwhile, had found Mr. K. J. McEwen, and together they secured a spare hose from the Deluge truck-house, which they dragged to the scene of the fire. They attached it to a hydrant, passed it through the house to Mr. Allen, and in the course of another half-hour the fire was out. The cause of the fire is imagined to be the careless dropping of a spark on the silk, which must have smouldered for some time. The damage done is estimated at about £5,000, which is fully covered by insurance.

**There was a young lady named Cutler,**  
Who set masculine hearts in a flutter;  
Some heart went insane,  
But the reason is plain—  
Her dad made a million in butter.

Now, Sir, said the manager of the Fort milk, you understand I want a boss who is thoroughly accustomed to handling men. In that case, said the applicant, nervously, I'm afraid it's not me that you want but my wife.

Saturday, Dec. 7. Club v. 25th Company, R.A.  
Monday, Dec. 9. A team match.  
Wednesday, Dec. 11. Club v. 2nd Company, R.A. at 4.15 p.m.  
Saturday, Dec. 14. Should tie—H.M.S. *Glory* v. 2nd Company, R.A.  
Saturday, Dec. 21. Should tie—Royal Engineers v. H. Company, R.W.F.  
Saturday, Dec. 28. Rugby match.

**Cricket by Arbitration.**

A writer in the Mercury says:—Echoes of the Cricket week continue to reach me. The last is to the effect that the most successful of our representatives are to be presented each with a suitable souvenir of the occasion, a memento which undoubtedly will fit their life time as a valued treasure. The China Mail in summing up the results of the play gives every high place to Shanghai, much higher than the modesty of our own men would have led them to claim. For a totally new idea, tending to the settlement of all interport questions, I commend to your notice the following bit of dialogue overheard down south. The dramatic personae are a lady of continental extraction resident in Hongkong, an English cricketor, and, as subject of discourse, one of the Shanghai team who had been badly hit at the wicket and was forced to retire.

Continental Lady pitifully, to Englishman—Who is this limping back to the Pavilion?

Englishman—That's one of the Shanghai team.

C.L.—What is the matter with him?

E.—He's been rather badly hit by the ball.

C.L.—Will he go out again by and-by?

E.—Oh yes; I expect so. He's not out.

C.L.—Poor fellow! He looks quite pale. Couldn't they settle these interport contests by arbitration?

**Cricket by Arbitration.**

A writer in the Mercury says:—Echoes of the Cricket week continue to reach me. The last is to the effect that the most successful of our representatives are to be presented each with a suitable souvenir of the occasion, a memento which undoubtedly will fit their life time as a valued treasure. The China Mail in summing up the results of the play gives every high place to Shanghai, much higher than the modesty of our own men would have led them to claim. For a totally new idea, tending to the settlement of all interport questions, I commend to your notice the following bit of dialogue overheard down south. The dramatic personae are a lady of continental extraction resident in Hongkong, an English cricketor, and, as subject of discourse, one of the Shanghai team who had been badly hit at the wicket and was forced to retire.

Continental Lady pitifully, to Englishman—Who is this limping back to the Pavilion?

Englishman—That's one of the Shanghai team.

C.L.—What is the matter with him?

E.—He's been rather badly hit by the ball.

C.L.—Will he go out again by and-by?

E.—Oh yes; I expect so. He's not out.

C.L.—Poor fellow! He looks quite pale. Couldn't they settle these interport contests by arbitration?

**Salaries of Subordinate Government Officers.**

On the 24th November, a telegram was received from the Secretary of State for the Colonies approving the recommendation contained in the following despatch from His Excellency the Governor:—

Governor's House,  
Hongkong, 15th October, 1901.

Sir,—When the Estimates were being considered, I found that a very strong feeling existed among the Un-official Members that any increase of salaries granted to the subordinate officers should date from the 1st January of the present year. I undertook to forward their unanimous recommendation to this effect, and I do so now with a strong recommendation that the views expressed by the Un-official Members, and shared by every member of the Legislative Council, may be accepted. I attach a report of the proceedings, and if you concur in my recommendation, I shall be glad to receive a reply by telegram. I have the honour to be, Sir, Your most obedient Servant,

HENRY A. BLAKE,  
Governor.

**TELEGRAMS.**

**THE CORONATION.**

LONDON, 3rd December, 1901.

The date of the coronation of King Edward and Queen Alexandra has been fixed for the 26th June next.

**THE SOUTH AFRICAN WAR.**

General Elliott has captured 12 Boers, 600 horses, 100 vehicles, and 300 cattle, in the northern district of the Orange River Colony.

**BANK OF LIVERPOOL FRAUDS.**

Golda, the defaulting book-keeper of the Bank of Liverpool, has been arrested.

**PRESIDENT ROOSEVELT'S MESSAGE TO CONGRESS.**

President Roosevelt's message to Congress deprecates a change of tariff. It recommends reciprocity so far as compatible with interests of home industries, admitting a more liberal policy required to secure wider markets. It strongly re-asserts the Monroe doctrine, and the necessity of steadily increasing the Navy to secure respect therefor. It dwells upon the benefits as well as the evils of Trusts, and advocates legislation empowering the Government to inspect their workings before restrictions are imposed. It urges stronger measures to exclude 'undesirables' from the country. It fosters the mercantile marine, the ratification of the Isthmian Canal convention, and a speedy construction of the canal. It urges the framing of a great policy of full and fair intercourse with China and the nations upon a footing of equal rights, and advocates 'the open door,' including access to inland waterways.

**WRECK OF A DESTROYER.**

LONDON, 3rd December, 1901.

The torpedo-boat destroyer *Salmon* has been wrecked by collision with a mail steamer in Hardwick harbour. Two stokers perished.

**TYPHOON WARNING.**</

## THE INTERIOR OF KWANG-TUNG.

## Seen Through Foreign Spectacles.

Perhaps it is not generally known by our local sportsmen, that there is a good deal of pleasant and profitable shooting within about eight or ten days' sail by native boat from Hongkong. These birds lie in the grass, backon, and short scrub by which the low hills are covered, and come down into the valleys to feed evening and morning. But such shooting would not be child's play, and could not be undertaken by anyone who is not able and willing to climb hills and leap over gullies. Birds do not exist in great numbers, because Chinese sportsmen, clumsy as they are, manage to find and shoot them, and do not hesitate to kill summer and winter. The shooting equipment of a native sportsman is a remarkable affair. He must protect his precious head but the thorns and brambles seem to have no power over his legs, which are bare, and his feet are shod with sandals which will not slip. His powder and shot flasks are made from the larger end of the buffalo horn, and are capacious. A net to carry the birds is slung across his shoulders. But the gun! Barrel long and heavy! Stock looked like an eagle's beak! General mechanism crude simplicity, and all as rusty as an anchor! When the bird rises, the sportsman does not put the gun to his shoulder, but to his eye as the machine does his eyes, and bang! Often down comes the bird. It is only another illustration of what a man can do with nothing, if he tries. But my aim is to tell you, what our sportsman needs, who can command the time and the energy, are two good, well-trained dogs, boots strong and spiked, like Alpine climbers, and strong light clothes, and a good digestive apparatus, and he will find away to get the best of a time as you like it, away from the iron rule of social usages.

THE CHINESE TELEGRAPH SYSTEM.

The working of the telegraph in the inland towns of China is a curious study. When one has to send a message, as often as not the impatient Englishman is informed, 'No can send, wire has broken,' which like the polite phrase, 'missed not at home,' may mean nothing.

But when things are in perfect condition and no obstruction is presented, then it is a study to enter one of these inland offices and criticise the inmates and their environment. I have been into more than one lately. Some are better equipped than others. Of course, the appearance of the foreigner affects the employees like the exhibition of the circus in a country town at home rouses the children. From every room and corner emerge youths wriggling into long robes as they approach; the only unsmoked members of the staff are two opium smokers, who lounge in perfect indifference, on the dirty divan. Surroundings are characteristic. Three clocks go, but they seem to go in different directions—at any rate, they don't go together. Gambling books lie about on the tables, and apparently are more studied than English. Filth and cockroaches abound, and no one molests either. By the time the foreigner has found a man, who can 'talk' English, fifty or more heads of the great unwashed are craning in through every door, window, or crevice. Even then the work has begun, for the operator has to swear at the crowd for looking in at his office, before he consults the book of regulations to ascertain the rate per word. When he has seized on the cash, and written the receipt, and recovered from his surprise, he begins to inquire if you are a 'Red-Furred Man,' or a 'Greenhorn,' and would, no doubt, proceed at length, if he were not reminded that he was paid to send messages and not to ask impertinent questions.

By the bye, a telegram passed through strange experiences, and finally found its way into a tobacco's pocket, who thought it was a bank note. It happened in this wise. A telegram was sent to a large inland town in which usually resides two Englishmen. But they happened to be from home. The telegram, which was in English, was then sent on by special messenger to a German mission station two days' journey away. The Germans, who saw that the address was English, rightly judged that it could not concern them, so sent the precious message back. On his journey back, the messenger was robbed by brigands, so returned without his message. Fortunately, the clerk had kept a copy, and this time the right course was suggested. 'Take it to the Englishman's house and leave it there.' The official offered \$20 reward for any clue of the stolen paper, which will, of course, confirm the thief in his assumption that he has secured a treasure, and when the future has subsided, he will probably attempt to cash it.

Extensive use of Stearns' Wine of Cod Liver Oil in all civilised countries has proved it to be the most powerful and reliable remedy for all ailments connected with the blood and the system. It has produced remarkable results where other so-called tonics and reconstructors have entirely failed. Sold by all Chemists, Wholesale from A. S. Watson & Co., Ltd., Hongkong.

## COUGHS AND COLDS IN CHILDREN.

RECOMMENDATION OF A WELL-KNOWN CHINESE PHYSICIAN.

I use and prescribe Chamberlain's Cough Remedy for almost all ailments, connected with the lungs and the system. I prescribe to children of all ages. Am glad to recommend it to all in need and seeking relief from colds and coughs and bronchial affections. It is non-narcotic and safe in the hands of the most unprofessional. A universal panacea for all mankind.—MR. MARY R. MENDON, M.D., Ph.D., Chicago, Ill., U.S.A. For sale by all Dealers. WATKINS Ltd., General Agents.

## THE WATER SUPPLY.

## Interesting Official Documents.

The following documents were laid before the Legislative Council to-day by command of His Excellency the Governor:

Registrar General's Office, Hongkong, 18th November, 1901.

Sir, The cutting off of the water supply for the greater part of the day causes, as His Excellency is no doubt aware, serious inconvenience to very many persons.

2. From 1897 to 1900 I lived in Causeway Road, and the crowds of Chinese who obtained water from a hydrant placed at the corner of Peel Street and Causeway Road showed that the inhabitants of the houses in the neighbourhood did not receive enough water through the pipes laid on to their houses. When there was no water to be obtained from the hydrant the Chinese used to draw it from the drain which runs down Peel Street. I do not know where the water in the drain came from, but it was very dirty.

3. On one occasion no water reached the house in which I was living for 48 hours, and a house in the near neighbourhood was frequently without water for longer periods.

4. There are many four-story houses inhabited by Chinese in which the water never reaches the top storey, and the people living there are dependent upon the compliance of their neighbours for water. It is hardly to be expected that the improvement in the water supply will keep pace with the increase of population, and I submit that the inconvenience caused by these recurrent water-famines, which may reasonably be regarded as inevitable, is so great and so wide-spread that permanent measures should be taken to reduce it as far as possible.

5. I venture to suggest, but with all deference as I have no expert knowledge of the subject, that an increase in the number of street hydrants would be of some effect in procuring a fairer distribution of the water available.—I have the honour, Sir, to remain, Sir, your obedient servant,

A. W. BROWN, Registrar General.

## MINUTE BY THE DIRECTOR OF PUBLIC WORKS.

Honourable Colonial Secretary.

It is undoubtedly the case that many top floors of houses do not obtain a supply of water under the intermittent system, being deprived of it by the water being drawn off by the lower floors, who draw it all off before it can rise to the top floors. The same thing happens as regards the houses situated on the upper levels being deprived of water by those on the lower level, and it is a well-known fact that this is a serious inconvenience to the inhabitants of the upper floors, who are unable to obtain water for their domestic purposes, in addition to having water laid on to the houses, would mean a great consumption of water, and would also inevitably cause a more frequent or more prolonged application of the intermittent system than at present.

Given the rainfall, our waterworks are about adequate for the wants of the City.

The rainfall of the last four years have formed an exceptionally low series:—

1898. 1899. 1900. 1901 to date.

inches 57 72 73 54

notwithstanding this, the intermittent supply has only been in force for 52 days in 1899 and 13 days in 1900. The rainfall this year is no less than 20 inches below the average, and but little has fallen since August 15th.

I do not, therefore, consider it advisable to adopt extensive temporary measures such as are proposed by the Honorable Registrar General.

22-11-01. W. C.

## MINUTE BY THE GOVERNOR.

Honourable Colonial Secretary.

I should like to know from the D.P.W. if there are any means by which the grave inconveniences caused by the intermittent supply can be lessened, without unduly increasing the expenditure on waterworks, such as are proposed by the Honorable Registrar General.

26-11-01. H. A. B.

## MINUTE BY THE DIRECTOR OF PUBLIC WORKS.

Honourable Colonial Secretary.

In reply to His Excellency's query, I would point out that the difficulties in the way of ensuring a supply of water to all houses in a City such as this, under the intermittent system, are very great.

To begin with, the houses in the City vary in level to the extent of 600 feet and at the Peak 800 feet. The main area of comparatively small diameter, being designed for a constant supply, and the result is that the houses on a lower level are able to draw off the whole supply and thus prevent water reaching those on a higher level.

The water, in passing to the lower level zone of the City is employed in working motors to pump up the supply to the high-level zone. When the constant system of supply is in force, practically the whole of the water supplied to the lower level zone is used in working the motors, but when the intermittent system is in force, the bulk of the water has to be allowed to flow through by-passes, without working the motors, which are too slow in their action to allow the large quantity required to pass through them. Consequently, the motors can only pump a very limited quantity under existing conditions.

Fortunately, the steam pumping engine, which is used for the Peak supply, can be utilized instead, otherwise the High Levels would be practically without water.

From what I have stated, it will be gathered that the intermittent system involves much arrangement and trouble to get it into proper working order, and this has been the greater on this occasion on account of the personnel of the staff employed in connection with waterworks having been entirely changed within the past two years. There is also the fact that enormous extensions of the City have recently been made both on the high and low levels.

Every endeavour has been made to ensure a supply to all houses, with, I believe, large, though evidently not complete, success.

The case of Mr. C. S. Sharp, which recently appeared in the newspapers, well illustrates the difficulties I have represented, as a neighbour of his, whose house is directly adjacent to a higher level, has, I am informed, received a share of water daily.

With regard to Bellilies and other Termites, from which complaints have also appeared in the papers, the difficulties I have referred to are aggravated by the fact that, in most cases, the houses are supplied through one service, the result being that those served first obtain all the available supply and prevent it reaching their neighbours. I have given instructions for a fountain to be fixed in this case, in order to enable the upper houses to obtain some water.

In the case of tenement houses, the landlords should insist upon the ground-floor tenants contenting themselves with a reasonable allowance of water so that the

## upper-floor tenants may stand a chance of obtaining some.

Judging from the diminution in the number of complaints reaching me, I infer that the arrangements are being working well. I regret that I should have appeared to treat complaints with indifference or discourtesy, but it would have been impossible for me to reply to them without almost entirely neglecting my numerous other duties.

W. C.

## HONGKONG POLO CLUB.

On Monday the first match in the tournament for the R. A. Trophy took place between teams representing the R.A. and R.V.F., constituted as follows:—

R.A. R.V.F.  
W. O. Sanders 1 S. Jones.  
G. Badham-Thorhill 2 O. S. Owen.  
Capt. Crutchebank 3 W. Lloyd.  
Capt. Stevenson 4 G. F. Dickson.

At the first throw in, the Fustlers got quickly on their feet, and the F.V.F. were not slow to follow, following up by another in the next 55 seconds. After this the R.A. pulled themselves together, but the ball was constantly out of play for the first few minutes, during which time the R.V.F. had scored in all three goals and one sub-goal, while the R.A. mainly through some good hard hitting by their back, had succeeded in scoring one goal. The game was a long period of 4 min. and 50 sec. during which the ball remained in play, neither side gaining any advantage, but the play being chiefly confined to the R.A. end.

In the second chukkar, play was almost entirely confined to the R.A. end, the Fustlers hitting goal after goal until they had 5 and three subsidiaries. On two occasions, however, Stevenson, riding fast and hitting hard, managed to get the ball down to the R.V.F. goal, where it was put through, but by whom we cannot say.

This was the only goal scored by the R.V.F. Crutchebank's pony absolutely refused to go near the ball, while Thornhill kept nearly half the time getting fresh sicks or trying to repair his stirrups, which had somehow gone wrong. The third chukkar only consisted of 3 min. Stevenson, who was now more at ease, and was now mounted on a China pony, getting in a certain amount of work, and during this period nothing was scored by either side.

The Fustlers were far better mounted than the R.A., but, besides that, they played far better together and hit harder. Stevenson was the best player on the ground, not only a very quick and powerful horse, but a very good player in any team.

The next match will be on Monday next when the Staff play a Club team. Play to commence at 3.45.

## THE WRECK OF THE 'AMHERST.'

Several Lives Lost.

The Singapore Free Press of the 24th ult. says:—Details reached the Shipping Office yesterday afternoon, but too late for publication in this journal, of the wreck at Kuala Pahang on the 17th inst. of Messrs. Wee Bin & Co.'s steamer the *Amherst*, 108 tons, Capt. Angus.

The vessel was brought to Singapore by the *Pleco*, which arrived here yesterday with the surviving passengers and crew of the wrecked vessel.

Capt. Angus remains at Kuala Pahang to attend to the salvage of the *Amherst*, and has had the assistance of the *Pleco*, which was reported by Mr. C. Baumgarten, Chief Engineer of the vessel.

He states that the *Amherst* left Singapore on the morning of the 16th inst., and anchored off Pahang at early morning on the following day. At ten o'clock the vessel was seen by the *Pleco*, and the weather being extremely rough, the *Amherst* took the bar. Strenuous efforts were made to get the vessel off, and the engines were worked until 12 o'clock in the afternoon, but without success. At 6 o'clock the engines were again started, and worked until midnight, when the vessel was again seen by the *Pleco*, and the weather being extremely rough, the *Amherst* took the bar. Strenuous efforts were made to get the vessel off, and the engines were worked until 12 o'clock in the afternoon, but without success. At 6 o'clock the engines were again started, and worked until midnight, when the vessel was again seen by the *Pleco*, and the weather being extremely rough, the *Amherst* took the bar. Strenuous efforts were made to get the vessel off, and the engines were worked until 12 o'clock in the afternoon, but without success. ## PROPOSED SAILINGS FROM HONGKONG.

(Subject to Alteration.)

EMPEROR OF JAPAN, Comdr. H. P. BUCH, R.N.R., WEDNESDAY, 18th Dec./1901  
EMPEROR OF CHINA, Comdr. R. ARCHIBALD, R.N.R., WEDNESDAY, 18th Dec./1901  
TARTAR, 4,425 Tons, Comdr. E. BEETHAM, R.N.R., WEDNESDAY, 25th Jan./1902  
EMPEROR OF INDIA, Comdr. O. P. MARSHALL, R.N.R., WEDNESDAY, 12th Feb./1902  
ATHENIAN, 3,882 Tons, Comdr. H. MOWAT, WEDNESDAY, 26th Feb./1902

THE magnificent TWIN-SCREW STEAMSHIPS of this Line pass through the famous INLAND SEA OF JAPAN, and usually make the voyage YOKOHAMA TO VANCOUVER (B.C.) in 12 DAYS, saving THREE DAYS to a WEEK in the Trans-Pacific journey, and make connection at Vancouver with the PALATIAL OVERLAND TRAINS of the CANADIAN PACIFIC RAILWAY, which leave daily, and cross the Continent FROM THE PACIFIC TO THE ATLANTIC WITHOUT CHANGE. Close connection is made at Montreal, Quebec, Halifax, New York and Boston with all Trans-Atlantic Lines, of which passengers to Great Britain and the Continent are given choice of.

Passengers booked through to all principal points and AROUND THE WORLD. Return tickets to various points at reduced rates. Good for 4, 6, 9 and 12 months. SPECIAL RATES (first class only) granted to Missionaries, Members of the Naval, Military, Diplomatic and Civil Services, and to European Officials in the Service of China and Japan Governments.

The attractive features of this Company's route embrace its PALATIAL STEAMSHIPS, (second to none in the World), the LUXURANCE OF ITS TRANS-CONTINENTAL TRAINS (the Company having received the highest award for signs at recent Chicago World Exhibition) and the diversity of MAGNIFICENT MOUNTAIN AND LAKE SCENERY through which the Railway passes.

THE DINING CARS AND MOUNTAIN HOTELS of this route are owned and operated by the Company, and their appointments and cuisine are unequalled.

## Special Extra Service.

The Company's Extra Steamship "ATHENIAN" and "TARTAR" have now been placed on the Line between CHINA AND JAPAN PORTS AND VANCOUVER, as additional sailings.

In addition to the excellent First Saloon Passenger accommodation, the "ATHENIAN" takes 2nd Cabin Passengers with accommodation unequalled on the Pacific, and also Stowage. The "TARTAR" takes First Class and Stowage Passengers only. The run is usually made between YOKOHAMA AND VANCOUVER in 14 Days. For further information, Maps, Guides, Books, Rates of Freight and Passage, apply to

## Insurances.

**'What**  
**to give'**  
is the question of the hour. The best  
gift for your wife is a Policy of Life  
Assurance. Clothes will wear out.  
A piano will get out of tune. Jewelry  
will become old-fashioned. Brie-  
ars will break. Most things de-  
teriorate with age. BUT NOT A  
POLICY OF LIFE ASSURANCE,  
the older it gets the more valuable it  
becomes.  
THE EQUITABLE  
LIFE ASSURANCE SOCIETY  
OF THE  
UNITED STATES.  
'Strongest in the World.'  
Apply (stating your age) for Particulars of  
the 'Guaranteed Cash Value Policies' to  
the Society's Branch Office, Hongkong.  
F. KIENE, Manager.  
Hongkong. 2607

**SALAMANDER FIRE INSURANCE**  
**COMPANY.**  
THE Undersigned having been appointed  
AGENTS for the above Company are  
prepared to accept Risks against Fire at  
Current Rates.  
HOTY, JACOB & Co.  
Hongkong, March 31, 1900. 738

**UNION ASSURANCE SOCIETY.**  
(Instituted in the Reign of Queen Anne  
A.D. 1714).  
CAPITAL FULLY SUBSCRIBED, £450,000.  
CAPITAL PAID UP, £180,000.  
TOTAL INVESTED FUNDS EXCEED £3,459,044.  
TOTAL ANNUAL INCOME, £1,103,983.  
THE Undersigned, having been appointed  
AGENTS of the above Society in Hong-  
kong, are prepared to issue Policies against  
FIRE on the usual terms.  
HARRY WICKING & Co.,  
Sole Agents.
